Grant County FULL-TIME DEPUTY RECORDER

Grant County, an Equal Opportunity Employer, located in Elbow Lake is currently accepting applications for the position of full-time Deputy Recorder.

Required qualifications include a high school diploma and considerable experience working with real estate records, or equivalent combination of education and experience. Applicants must have experience and knowledge of operating personal computers and software applications, including spreadsheets and word processing. The position, under the direction of the County Recorder, is responsible to perform intermediate skilled administrative support work recording real estate documents and vital records. The Deputy Recorder's job duties include, but not limited to; accepts marriage applications and issue marriage licenses, assist Veterans with filing DD214 forms, assist with the County GIS system, accept and process US Passports. Good communication skills both written and oral with accuracy to details.

Deputy Recorder is a full-time, non-exempt, union position. Anticipated beginning pay is \$19.80 per hour. Health insurance is available and pension benefits are provided.

An application may be obtained from the Grant County website:

www.co.grant.mn.us

or contacting Human Resources at 218-685-8323, to request an application.

Applications must be submitted either online or dropped off at the Grant County building, 15 Central Ave North, Elbow Lake, MN 56531.

Phenomenal Aire

Cold Plasma Generator Technology

**Phenomenal Aire Improves Indoor Air
Quality and Cleans Naturally and Safely.**

Phenomenal Aire's cold plasma generator technology can offer the same feeling you get when hiking on a high mountain trail or strolling along the ocean shore... without ever leaving the house.

The Truth about Indoor Air Quality
According to the US Environmental Protection Agency (EPA), the air inside our homes is often two to five times more polluted than the outside air. On average we spend 90% of our time indoors. The air we breathe is filled with pathogens, odors, mold and fungus spores.

How Phenomenal Aire Works

Phenomenal Aire creates a plasma field within a home's HVAC system. As air flows through the field molecules are charged, creating ions. These positive and negative ions then naturally scrub the passing air. The ions then travel on into the living space, where they safely kill mold, viruses & bacteria.

Removes Odor

Odors and VOCs enter the Plasma Field and are broken down into simple molecules like Nitrogen, Carbon Dioxide, Hydrogen, H₂O, Water Vapor & Oxygen.

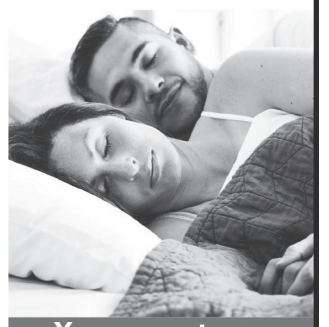

Cleaning Air Naturally Dedicated to improving health and changing lives.

Phenomenal Aire Cold Plasma Generator technology kills pathogens and germs while eliminating odors from the air we breathe, without creating any harmful by products.

- Is ETL Listed & Meets ASHRAE Standards
- Generates No Ozone
- Generates No Offensive Smell or Taste
- Easy Installation
- Affordable
- Safe
- Has no moving parts
- Has no planned replacement schedule
- Only requires simple periodic inspection & cleaning

Cleaning Air Safely

You can rest easy knowing it's working!

ARE YOU IN A RUT?

By Bev Johnson
Otter Tail County Master Gardener

Do you plant the same old annuals every year? Petunias, impatiens, geraniums and maybe slip up and get a 6 pack of lobelia? Friend, you are in a gardening rut and a rut is just a grave with the ends knocked out. Go wild and crazy this year and try something new.

If you are buying seeds from a catalog, remember to stay in your zone. We are a zone 3 B/ 4A. We are at the 46th parallel. Go east or West along that line but only about 250 miles north or south. Check the address of your catalog to be sure it is in that general area for the best results. Also look for short season seeds. The days to maturity listed is not the day you started the seed indoors but the day you planted it in the garden. Even direct seeded seeds need to mature in about 90 days or less or you are flitting with early frost.

If you grow the same squash every year, try a variety that looks totally different from your usual pick. Plant both. If you grow pumpkins, plant a few smaller ones. Many of them are very good eating. If you like pumpkin seeds, plant Peptias hybrid. It has "naked" seeds and the flesh is good for pies. If you have had problems with watermelon getting fully ripe, try again. Many of the smaller ones ripen in 65 to 85 days and they don't take up the whole garden. Even a few of the 30 pounders will ripen now in our longer summers.

If you like sweet potatoes, plant a few. It takes a bit more work but just think of the bragging rights. To do it properly, hill up a fairly large mound then cover it with black plastic to prewarm the soil. Slit the plastic and place your plant your plants

on top of the mound about the same time you plant tomatoes and pep pers. Two that are recommended for our climate are Beauregard and Georgia Jet, both 90-day varieties. Leave them in the plastic covered soil until the tops die. They grow horizontally so be sure your mound is wide enough.

If you like fresh spinach, plant Bulls Blood beets. They are cousins to spinach, but the leaves are milder tasting. Lutz Green Leaf or Winter Keeper has the same good tasting leaves, but the beets need to be stored for a period of time for the best taste. These are purported to keep all winter and get sweeter throughout the winter.

If you need a bright accent in the front of your flower bed, plant profusion bicolor zinnias. They are bright yellow with a bright red middle and are only 12 to 18 inch tall. Like all zinnias, they will bloom all summer if you keep them deadheaded. Another fun flower to plant from seed, is the small Dahlia. The plant will be a mix of single and bicolors from pastel to very bright and single to double petals. They are short too, only about a foot tall.

If you plant pinks, Dianthus, let them go to seed at the end of the growing season. They will happily re-seed themselves. Calendula is also a re-seeder. If you have ever planted cosmos, you know that they have a habit of popping up all over the garden the next year no matter how religiously you deadhead them. A pretty new one is Sweet Dreams, a white flower with pale pink centers.

Go crazy and try a new plant or a different variety of the plant you always planted. Get out of that rut before the ends cave in.
